AMENDMENT

Sir:

In response to the Office Action mailed on December 27, 2002, please reconsider the above-identified application based on the following:

IN THE CLAIMS:

Please add without prejudice new claims 24 to 30, as follows:

24. (New) A method for transmitting signals between a transmitter and a receiver, the method comprising:

[calculating data as a function of a secret key using at least one cryptographic algorithm in a calculation phase,] the calculation phase including generating a pseudo-random sequence, certain strings of the pseudo-random sequence being used for coding the signals and positions in the transmission sequence, and wherein the authentication token of one of the signals transmitted at an i-th position is calculated as a function of the coding of the signal and the coding of the respective position in the transmission sequence; and

calculating authentication tokens for the signals as a function of the data in a communication phase so as to authenticate both the signals and a transmission sequence of the signals, the authentication token of the one signal transmitted at the i-th position being a bit-
